

Daniel Schoener is an innovation leader and has been working as an independent consultant a since early 2020.

He has 12 years of global medical product development experience working for Roche Diagnostics and PerkinElmer. As corporate R&D leader he was responsible for product portfolios for these companies that are now totaling ~\$2B in annual revenue. He is passionate about radical innovation and is an active mentor in the New England innovation ecosystem supporting upcoming startups in Diagnostics, Digital Health and Clean Tech.

In his corporate career, Daniel has directed late stage tech integrations, global tech transfers, R&D partnerships and held senior leadership positions in Business and R&D. He is intimately familiar with taking teams through changing environments, while instilling confidence in achievement and assuring focus on positive outcomes.

He holds a PhD in Computational Biology and a Masters in Data Analytics from ETH Zurich in Switzerland as well as a Diploma in Biology from the University of Freiburg in Germany. Daniel now lives in Brookline, Vermont, managing international innovation projects from his sylvan home and he is looking to promote economic development in the region.
