Data-Informed Community and Economic Development in VT

Kevin Chu, VT Futures Project

Emma Spett, UVM Office of Engagement

May 23rd, 2023

Introductions

Kevin Chu

Executive Director, Vermont
Futures Project

Emma Spett

PhD Student, UVM Department of
Community Development and

Applied Economics + UVM's
Office of Engagement

Agenda

The Problem of Data

- What is data?
- Challenges of rural data
- Vermont's unique data challenges
- Data-informed problem definition

The Promise of Data

- Resources
 - Federal | State
- Opportunities for building VT's data-informed decision making capacity
 - Building data systems
 - Collaboration

Discussion

THE UNIVERSITY OF VERMONT

What is Data?

- Answer on menti.com with the code: XXXXXXXX

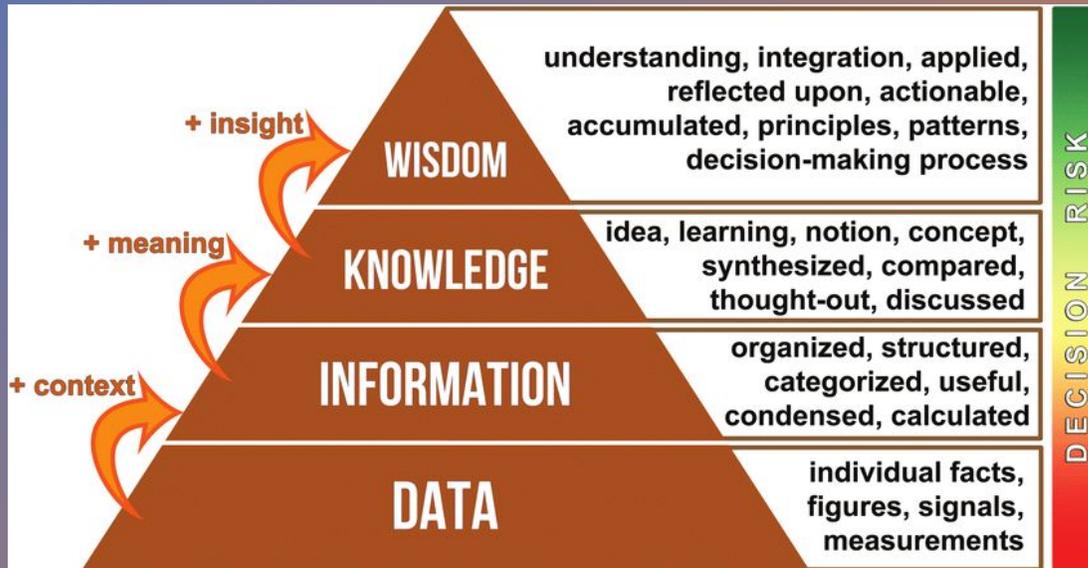

What is Data?

“Where is the wisdom we have lost in the knowledge?

Where is the knowledge we have lost in the information?”

TS Eliot, *The Rock*, 1938

DIKW Hierarchy

Two Questions for You:

Why do we need data?

How does your
organization utilize (or
aspire to use) data?

THE UNIVERSITY OF VERMONT
OFFICE OF ENGAGEMENT

Challenges of Rural Data

- Smart Cities vs. Smart Rural Communities: What shifts need to be made to accommodate unique rural circumstances?
- Studies on Rural Datafication focuses on digital divides rather than how rural communities leverage digital technologies (Young 2019, p.66)
- Center on Rural Innovation's Rural Aperture Project: How do we equitably and accurately account for diversity in rural communities?

**Rural
Aperture
Project**

THE UNIVERSITY OF VERMONT

Vermont's Unique Data Challenges

- [GovTech score of B](#)
- Data access and availability was cited as a significant challenge to progress in VT from the Roundtable Report
- Discussion of mentimeter results

The Promise of Data

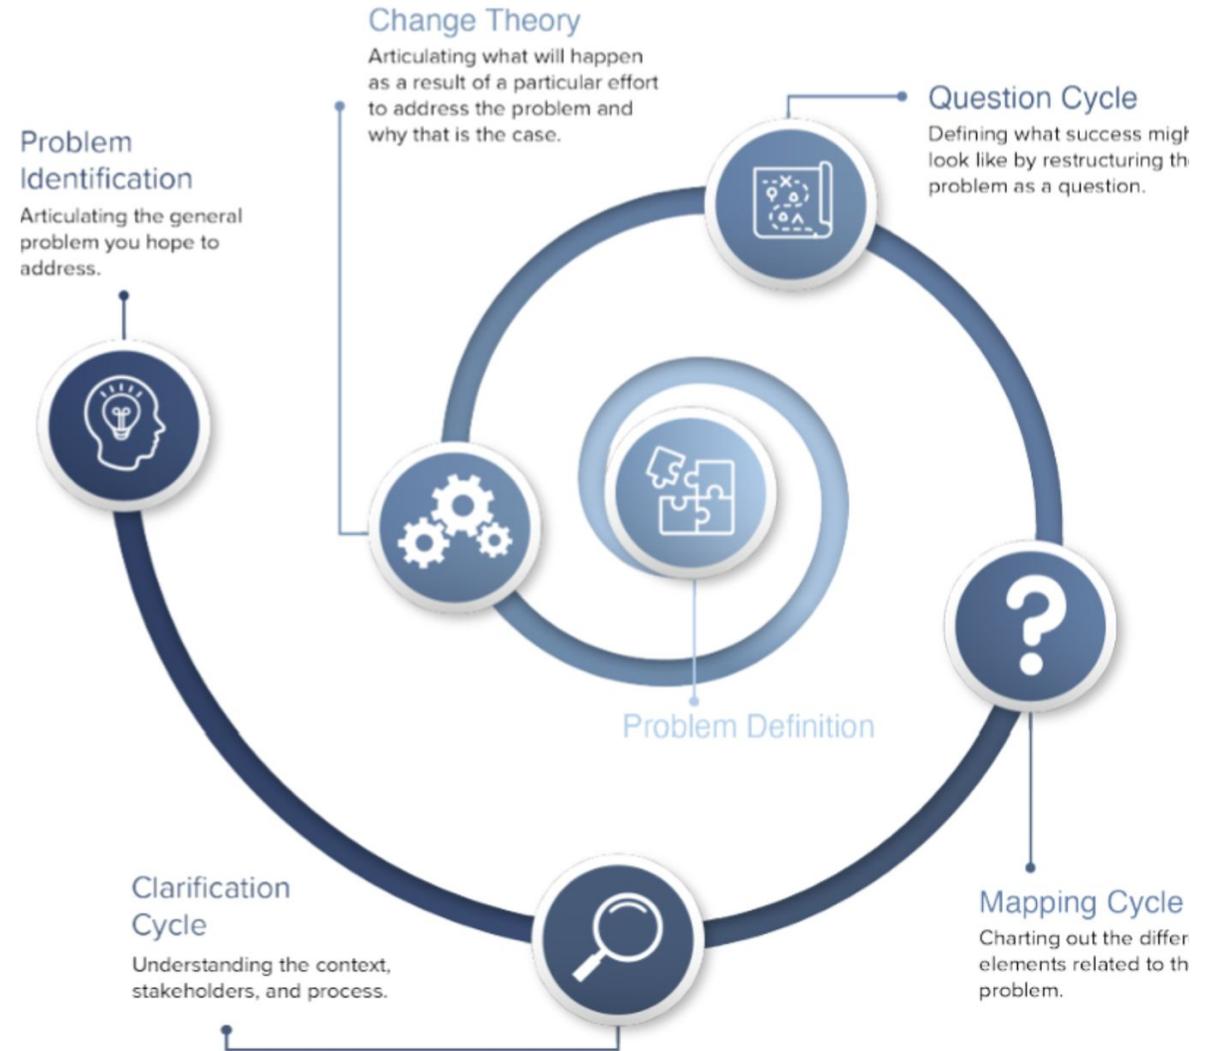

Turn to your neighbor and discuss:

- How do we currently utilize data?
- Where and how can we use data to develop programming and policies?
- How do we take into account the challenges?

We will ask folks to report back to the group!

Data-Informed Problem Definition

Open Data Policy Lab

Pursuing a Mission Question

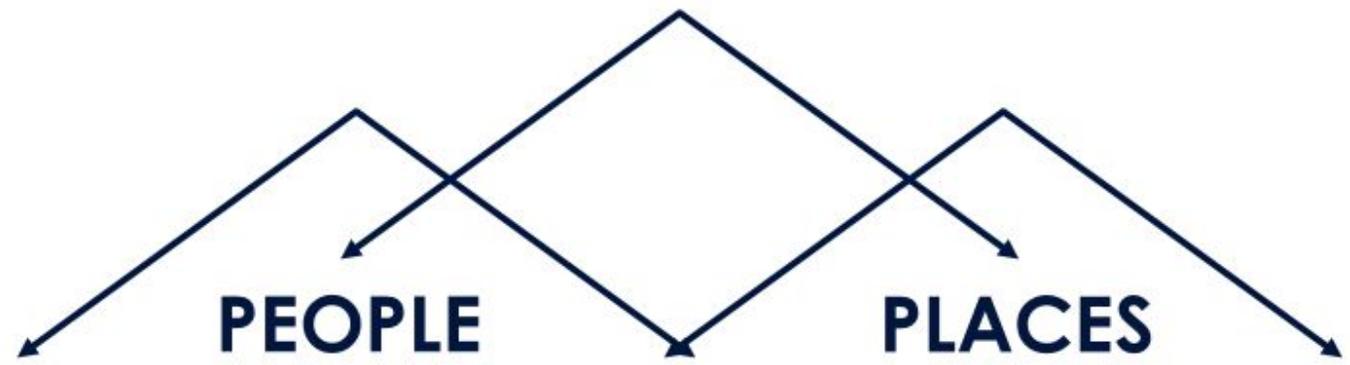

Our Mission Question: How can we use data to support the evolution of Vermont's economy towards a thriving future full of opportunity for all?

Developing an economic action plan

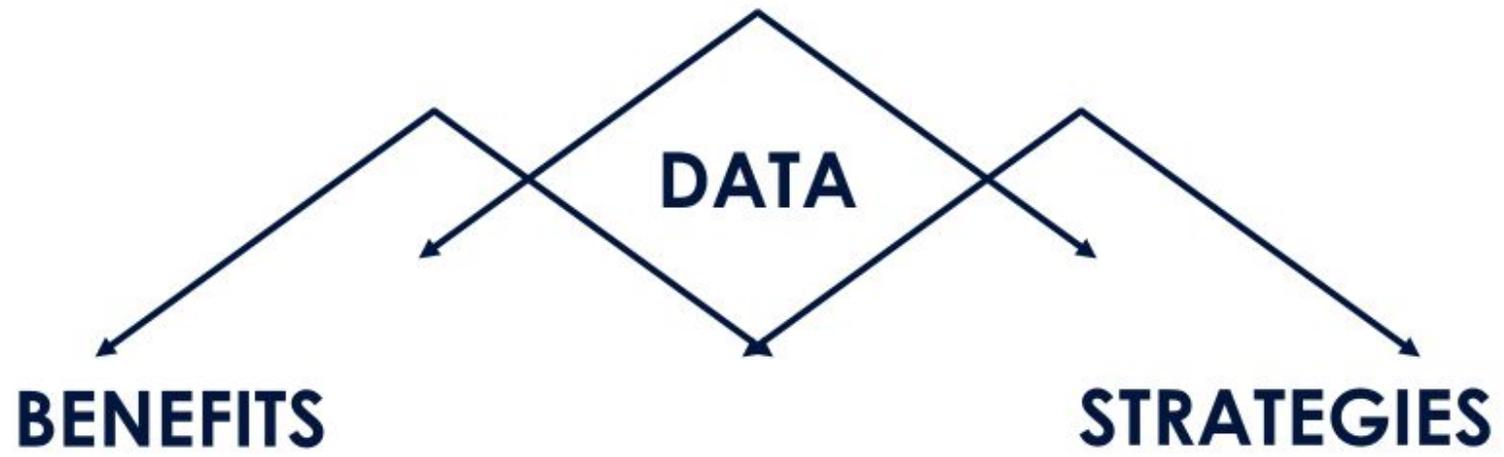

- Data-informed
- Building on existing work
- Consensus on a framework and targets

VERMONT'S FUTURE

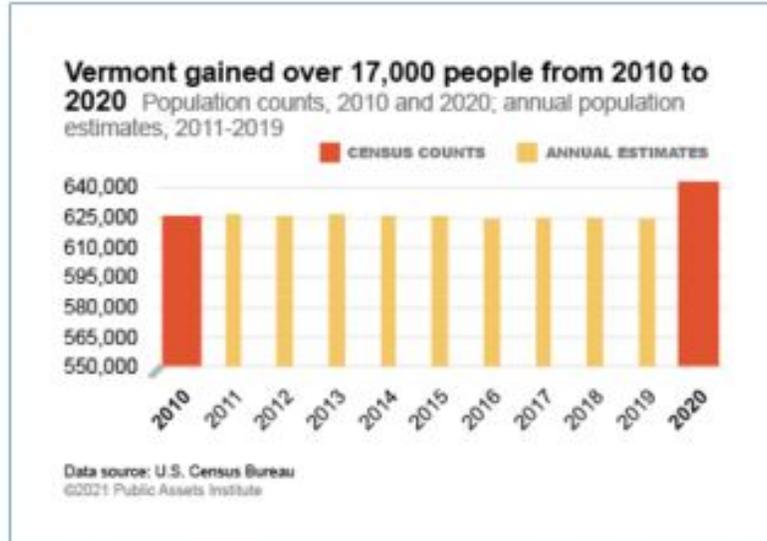

PEOPLE | PLACES

Asking Better Questions

US Census 2020: Vermont is growing *older*

... and we don't know what we want to be when we grow up!

Sound alarm on demographics

Public Assets Institute Vermonters can stop sounding the alarm about a dwindling population. The state gained 17,336 people in the last decade, according to the 2020 US Decennial Census. While Vermont's 2.8 percent growth is lower than the 7.4 percent national increase, it is not the slight population drop suggested by estimates made yearly by the Census.

TOTAL PRE-K TO 12TH GRADE ENROLLMENT

WORKFORCE SHORTAGE

What if every unemployed person in Vermont found a job?

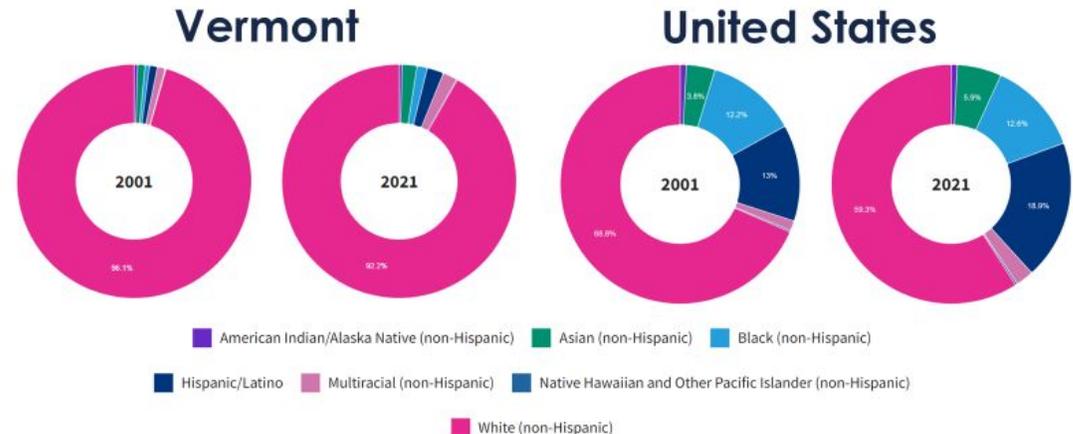

20,000 open jobs – 10,000 job seekers = 10,000 remaining jobs still open

Vermont - Unemployed Persons per Job Opening Ratio

Year	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
2012	1.9	1.9	1.7	1.4	1.7	1.7	1.7	1.7	1.9	1.9	1.5	1.8

Discussion

- Reflections on today's presentation
- What types of resources at the state and local levels would feel useful to you?
- How could you begin to incorporate data-informed decision making into your current processes?
- What are the major barriers?
- How can we help each other?

Keep in
Touch!

We welcome the opportunity to collaborate with you on building data-informed approaches to your work!
